

HDMI v1.4 Switch 4x1 (4 inputs, 1 output) with Audio Out (1x Analogue and 2x Digital)

With this product you can connect 4 source devices (i.e., notebook, PlayStation, BluRay player) to 1 display (i.e., TV or projector). This switch also extracts an analogue (stereo, AUX) and/or a digital (SPDIF/Toslink or Coaxial) audio signal to connect to your amplifier or to speakers with a build-in amplifier.

Installing this product

- Connect at least one source (i.e., notebook, Blu-Ray player) with INPUT1, INPUT2, INPUT3 or INPUT4 with a HDMI cable
- Connect the display (i.e., TV or projector) to OUTPUT with a HDMI cable
- If you want to connect external audio (i.e., amplifier or active speakers), connect a 3.5mm jack cable to the 3.5mm Jack Audio OUT (for analogue 2.0 sound) or connect a SPDIF/Toslink cable to the Toslink optical Audio OUT / RCA cable to COAX OUT (both for digital audio up to 5.1 sound).
- Connect the device to a power source with the adapter
- Select the source you want to display with the SELECT button. You can also use the remote control.

Notes

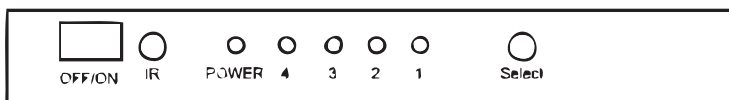

- Press the SELECT button for 5 seconds and it will switch between 5.1 and 2.1 audio channel
- Using HDMI cables longer then 7.5m may cause display problems
- The L1-L4 LED lights show which source is selected
- It is not recommended to change the settings while playing content. This will interrupt the playback for approximately 10 seconds.

Specifications

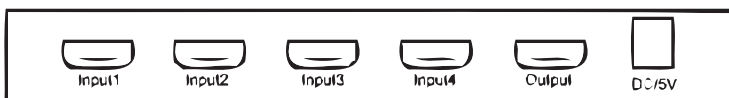

HDMI version	HDMI 1.4b	Max input cable length	7.5m AWG24 HDMI cable
HDMI resolution	up to 1080i/1080p (Full HD 3D)	Max Output cable length	7.5m AWG24 HDMI cable
Max bandwidth	340MHz	Max working current	800mA
Max band rate	3.4Gbps	Power adapter input	AC(50/60Hz) 100V-240V
Video color format	24/30/36 bit deep color	Power adapter output	DC 5V/1A
